

USER MANUAL
USB 2.0 Endoscope Camera

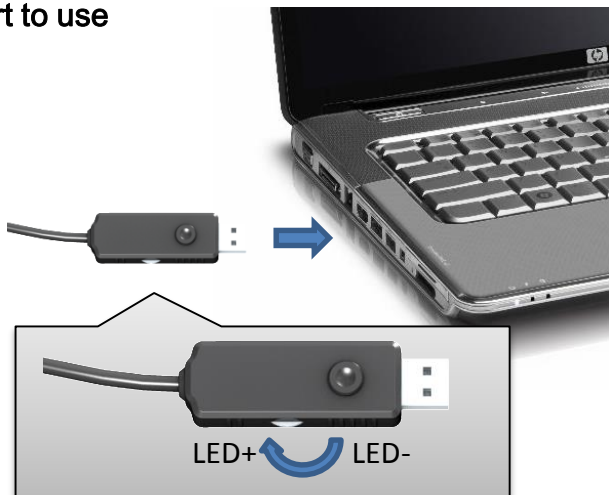

Description

This USB Endoscope is a portable, handheld video endoscope system with a flexible insertion tube. It can easily be operated by plugging directly into your computer. The high resolution camera provides good video quality and with adjustable LED lights on the tip, you can see clearly in dark area. The camera head and cable are water resistant which makes it possible to work in multiple environments. You can also capture pictures or record videos through your computer or laptop easily with the bundled software.

 **This appliance is not intended for medical use or personal inspection.**

Start to use
